Please vote NO on proposed rail spur on the Nipomo/Arroyo Grande mesa. The air quality on the mesa is already below acceptable levels. Adding a train diesel engine running 12 hours a day is only going to make it worse! The engine runs the whole time they are unloading for however long it takes. We can't even go outside now on many afternoons.

Please vote NO - don't turn us into the City of Industry!

Thank you for your time and consideration.
